

Shoe Size Conversion

Depending on where the shoe is manufactured will depend on the number printed on the shoe. Shoes ordered on this website are UK sizes, and you will be sent the US/Euro equivalent. To help you determine the shoe size below is the conversion chart.

As a rule of thumb when ordering Ballet shoes you should order two sizes larger than actual shoe size. We must stress this is only industry rule of thumb and is not the case with all students therefore Expressions do not take any responsibility if the shoes are too large/small.
